

MAST ACCESSORIES

All the fork-lifts of the **Series Elephant**, thanks to the coupling type FEM2, can be equipped of a bin rotator operated hydraulically from the seat. Thanks to the bins rotator, the operator can dump the content of the bins safely and comfortably.

Code	Description
CM165FLAPPFR	Bins rotator with adjustable forks
CM165/5S15	Bins rotator standard outfit
CM180/PF15	Bins rotator without forks

**Work platform**  
Certified platform with sliding in-out boards very useful for maintenance operations such adjusting hail nets, repairs on trellis, pruning etc. Models and prices on request.

**Stainless steel container**  
During grape harvesting it may be useful to hook on the forklift a stainless steel container for delivering grapes from the pickers to the trailer parked on service road. The container is equipped with a hydraulic piston for facilitating the dump of the product. Models and prices available on request.

**Front bucket**  
It may be useful, in a farm, to have available a bucket to be mounted on the fork lift for transporting any type of material, from gravel to manure.

CMBL500	Hydraulic Bucket width mm 1550, capacity 550 liter, coupling FEM2 – 1 piston.
CMBL600	Hydraulic Bucket width mm 1750, capacity 600 liter, coupling FEM2 – 2 pistons.
CMBL/M880	Hydraulic Bucket width mm 1750, capacity 880 liter, coupling FEM2 – 2 pistons.

CMA001	<p><b>Work basket</b> The certified work basket can be connected to the fork lift for maintenance operations. Dimensions mm 1100x900x1100 Maximum capacity 400 Kg Tare 140 Kg.</p>
